Talks not Included in these Proceedings

Jerzy Lukierski
Deformations of D=4 Space-time Symmetries -
Recent Developments
From Two-twistor Space to Extended Space-time Dynamics

Viatcheslav Mukhanov
Inflation and CMB:
1. Inflation for Pedestrians
2. Quantum Cosmological Perturbations
3. CMB-Slow

Stanislaw Woronovicz
Quantum ax+b and Related Groups

Kasper Peeters and Marija Zamaklar
String/Gauge Duality in the BMN Limit and Beyond

George Zoupanos
Classical and Quantum Reduction of Couplings

Nikolay Nikolov
Vertex Algebras in Higher Dimensions and
Globally Conformal Invariant QFT

Petko Nikolov
Geometrical Methods in the Mathematical Physics:
Symmetry and Dimensional Reduction

Stanislav Spichak
On Algebraic Classification of Hermitian Quasi-exactly and
Exactly Solved Matrix
Shroedinger Operators on Line

Srdjan Vukmirovic
Hypercomplex Structures on 8-dimensional Lie Group
